Super Impact
Incremental sectoral ACE strategies
Successful enforcement of Rule of Law
Systemic anti-corruption strategies
Assumptions
Parallel policies are implemented (parliamentary /judicial reforms etc.) for macro level anti-corruption reforms
Impact
Impact: Better development outcomes
Sufficient mandate and resources are provided for growth enhancing policies
Systemic Change
Reduced rent capture
Improved design, implementation and enforcement of AC strategies
More productive private sector
A sufficient number of key political actors engage to effect change at system level due to realigned incentives
Behaviour Change
Governments and development partners change programme design and join up interdependent interventions to support feasible AC
Media becomes agent for change
Corruption reported to support feasible policies
Better knowledge and evidence are key to mobilising action, and designing and implementing effective programming
Media pressure influences state institutions
Practice Change
Policymakers and development partners engage with AC strategies
Access to and use of evidence to build pressure for change
Media start to report on AC in a specific way
Development actors have interest in evidence and appetite and resources to use evidence in policy making and programme design
Dissemination
Government
Development Partners
Private Sector
Policy Think Tanks
Research Institutions & Academia
Civil Society
Media
Publications
Website & Learning Platform
Workshops
MOOC
Social Media
Development actors have interest in evidence and appetite and resources to use evidence in policy making and programme design
Evidence
SOAS-BA Synergies
Grants
Evidence and Data
Research Outputs (working papers, journal articles)
Evidence-based Policy Briefs
ACE Sector specific strategies
Findings are communicated effectively to enable them to be used in the design of new programmes and influence actors
Activities
Political Settlement and Rents Analysis
FEASIBILITY
IMPACT
I Sector selection P
I Corruption process analysis/ Rents mapping P
I Identification of coalitions P
ACE Clusters
New research can link with implementation programmes
P = Private Sector
I = Interdependencies
